

## TimeClock Plus 7.0 Enterprise System Requirements

### Web Server and Database Server Requirements

#### Window Platforms

- Windows Server 2008 R2
- Windows Server 2012
- Windows 7
- Windows 8

\*Server Operating systems are recommended for high transaction environments.

#### Hardware:

- 4 core processor or equivalent (minimum 2 gigahertz (GHz) per core)
- 8 gigabytes (GB) of RAM or higher
- 30 gigabytes (GB) of hard disk space OR if you plan to host your App Server and Database Server separately then allow 10 gigabyte (GB) of space on the App Server, and 20 gigabytes (GB) of space on the Database Server
- Broadband Internet: 8 Mbps up or higher

#### Software:

- SQL Server 2008 R2, 2012, 2014
- Microsoft .NET 4.5
- Resolution: at least 1024 x 768
- SSL certificate required (HTTP traffic is supported, but **not recommended**)

Depending on the number of employees and Users in your environment, it may benefit your organization to use a load balanced environment to increase scalability, performance, and availability of the TimeClock Plus application.

This type of setup will require a load balancer and multiple server nodes to host the application. The number of servers depends on your organization's specific needs, such as throughput and reliability. Please consult with our TimeClock Plus Professional Services Team to determine if a load balanced environment would benefit your organization.

### Client Requirements

#### Hardware:

- 1 gigahertz (GHz) processor or equivalent
- 2 gigabytes (GB) of RAM or higher
- Broadband Internet: 3 Mbps download or higher

#### Browser:
